**Dear Konrad Group Hiring Manager,**

My name is Zhiren Zhan. Thanks for the opportunity to apply the full stack developer at Konrad Group. With the professional programming abilities and full stack working experience, I believe I am a perfect fit.

After taking the full stack developer intern in Tsinghua Internet Energy Research Institution, I found I was so eager to be a full stack engineering. Because I can deploy algorithms and present my creative ideas to clients. Currently, I am engaging in building my own web server including web page design, back-end apps, database connection and daily maintenance.Before this, I have finished several fascinating project with my friends or colleagues, such as C language project "Smart Guide" and "Robot Soccer" by assembly language.

Being full stack developer matches my abilities as well as fulfills my enthusiasm and interests. Also, I am keen to learn more professional coding ability or working experience during the job. I am so exciting to provide my programming skills and creativity for the group and put my effort to develop the web applications.

I am looking forward to show that my abilities and passion will benefit group. And I am thrilled to obtain more information about full stack developer.

**Best regards,**

**Zhiren Zhan**
